

# Projects and Honours Theses

**Every Computer Science Major at Acadia must complete either a project or an honours thesis.**

A project is a 3 hour credit course and the honours thesis is a 6 hour credit course. Below are the supervisors who are willing to supervise a project or a thesis. Click on the name of the supervisor to see a list of project or thesis topics that they are interested in. Also below is the project contract agreement which you fill out once you find a project you are interested in, as well as the project course outline.
